

UNI-DOSE PACKAGING AND DISPENSING MACHINE

PRODUCT INTRODUCTION

■ UNI-DOSE PACKAGING AND DISPENSING MACHINE

General Healthy's Intelligent Uni-Dose Packaging and Dispensing Machine is designed for packaging and dispensing uni-dose oral medications with bottles according to pharmaceutical prescriptions. After receiving prescriptions from the HIS system, it automatically packages uni-dose tablets or capsules with medication bottles. Essential information concerning medications and the patient is labeled on each container, allowing for traceable management of medications.

■ FEATURES

Leading Dispensing Speed

Boasts a remarkable dispensing speed, up to 180 bottles/h(on the condition that each bottle contains 20 pills.)

Optimized Capacity

Provides three models, capable of storing 60, 120, or 180 types of medications respectively with intelligent cassettes, delivering maximized storage capacity.

Automatic Labeling

Labels the medication bottles automatically without manual intervention.

Automatic Cleaning Module

Features an automatic cleaning function for dispensing channels.

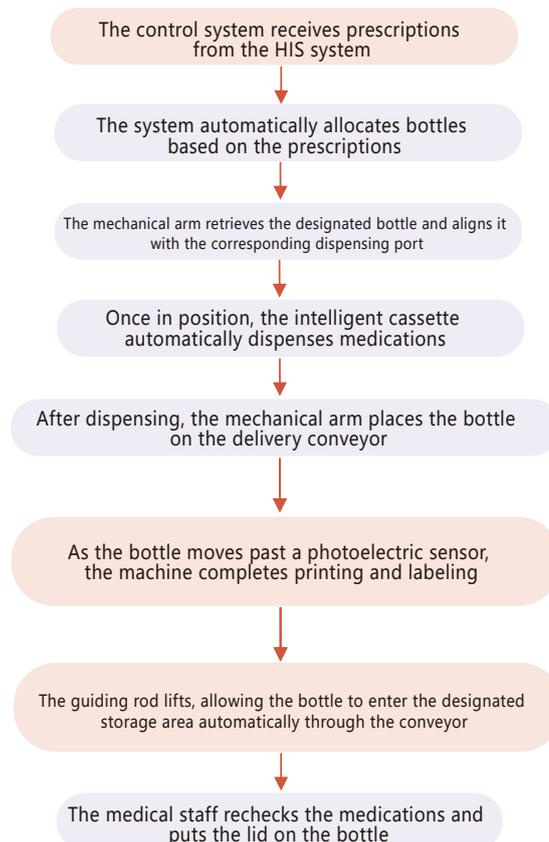

Fully Automated Dispensing

Integrates with the HIS system (Pharmacy Management System) and automatically allocates bottles based on the prescriptions. The mechanical arm retrieves the designated bottles, completes dispensing and places them onto the delivery conveyor.

Comprehensive Software

Facilitates the management of medication cassettes, medication information, and storing & dispensing process; provides shortage alerts and real-time inventory checks.

■ WORKFLOW

Product model:	X60A	X60H	X120A
Drug Storage Type	Flat pharmacy type	Flat pharmacy type	Flat pharmacy type
Intelligent medicine box	60PCS	60PCS	120PCS
Automatic cleaning function	Standard configuration	Standard configuration	Standard configuration
Dehumidification system	Standard configuration	Standard configuration	Standard configuration
Automatic assembly system	/	Standard configuration	/
Automatic bottle cap twisting system	/	Standard configuration	/
Smart wristband	Standard configuration	Standard configuration	Standard configuration
Touch screen	Standard configuration	Standard configuration	Standard configuration
Thermal printing paper	Standard configuration	Standard configuration	Standard configuration
